EvaluationWeb

Created by Luther Consulting, LLC, EvaluationWeb is an online service providing a customizable and user-friendly method of [data collection and reporting]. From server hosting to reporting, EvaluationWeb takes care of the hassles associated with developing and deploying data collection systems, allowing you to focus on the program itself. We are a [leader in our industry] and distinguish ourselves by offering customizable program evaluation data collection systems that are less expensive than custom computer programming. In addition, our unique experience with both evaluation and programming allows us to rapidly create and support these systems in far less time than most large tech companies. To learn more about how EvaluationWeb can make data collection and evaluation [easier for you], contact Luther Consulting, LLC at:
